

BOMB SUPPRESSION BLANKET & BLAST CONTAINMENT RING

The Explosive Ordnance Disposal (EOD) / Improvised Explosive Device (IED) Bomb Suppression Safety Blanket is the most cost-effective and easy to use product currently available for containing fragments and shrapnel from explosive devices. It is in use by Armed Forces and Police units, as well as many large government and corporate offices, in many countries worldwide.

The Bomb Suppression Safety Blanket has been designed for use by both unskilled personnel, as well as by skilled EOD/IED operators, when confronted with a suspect explosive device in a public area. The Safety Blanket is placed around the suspect bomb and then the Bomb Blanket, which has four heavy-duty webbing carrying handles, is carefully placed over the Safety Blanket surrounding the bomb. This eliminates any direct contact with the bomb and provides a safe environment for its examination and disposal.

HOW USEFUL IS BOMB SUPPRESSION BLANKET (BSB) AND BLAST CONTAINMENT RING (BCR) ?

Bomb Suppression Blanket (BSB) and Blast Containment Ring (BCR) are suitable for use in Railway Stations, Important Trains, Airports, Bus Terminals, Shopping Malls, Post Offices, Weekly Markets, PCR Vans, Control Room in Festivals/Fairs and Theaters etc. The Blast Containment Ring is first placed on its edge around the suspected bomb/ IED and the Bomb Suppression Blanket is then placed over the Blast Containment Ring and suspected bomb, while awaiting examination. This combo deters side fragmentation discharge as well as top discharge. (The Bomb Suppression Blankets are used in conjunction with the Blast Containment Ring)

Should a detonation or explosion occur, the ring directs the force of the blast upwards and the Blanket flexes and contains most of the fragments created by the explosion, so that the damage to personnel or property in the area is considerably reduced. It provides prompt and effective method for dealing with suspected packages.

Available Sizes –

BLAST CONTAINMENT RING & BOMB SUPPRESSION BLANKET

	RING LENGTH (FEET)	RING HEIGHT (FEET)	BLANKET LENGTH	BLANKET WIDTH
SIZE A	4'	1.5'	3'	3'

TECHNICAL SPECIFICATION –

PROTECTION AGAINST BLAST FRAGMENTS – LEVEL F1/F2/F3-V50
@ 500/550/600/650 m/s.

MATERIAL – ARAMID (KEVLAR) 129 HT 100 DTEX, BALLISTIC FABRIC.
COVER - FIRE RETARDANT, WATER REPELLENT HEAVY DUTY NYLON
REMOVABLE COVER

CONVENIENCE – NYLON WEBLOOP NEAR 4 CORNERS. P.U. TYPE CORDURA.

SAFETY – PARACHUTE ACTION ON HIGH MAGNITUDE EXPLOSION.

EYELIDS ON EACH CORNER FOR FIXING.

DIMENSIONS – AS PER YOUR REQUIREMENT.

WEIGHT – 6-7 KG./SQ.MT.

COLOUR – AS PER YOUR CHOICE

HIGH QUALITY NYLON BELT WITH VELCRO ATTACHMENT FOR EASY FIXING
